SUMMARY

Computer Science Engineering graduate (2026) with hands-on experience in **Java, Spring Boot, Node.js, and MySQL** backend development. Skilled in developing RESTful APIs, designing database-driven applications, and applying Object-Oriented Programming principles. Possess a strong foundation in **Data Structures, Algorithms, and SQL**, with a commitment to building scalable, high-quality software solutions.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

City Engineering College, Bengaluru, India | 2022 - 2026 | CGPA: 7.88/10

TECHNICAL SKILLS

Languages: Java (Core Java, Java 8+), TypeScript, Python

Backend: Spring, Spring Boot, Node.js, Express.js, Microservices, REST APIs, Hibernate, JPA, Prisma ORM

Frontend: React.js, Angular, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap

DevOps and Tools: Docker, Kubernetes, Jenkins, Git, Maven

Databases: MySQL, PostgreSQL

Core Concepts: Data Structures and Algorithms, OOP, SQL, JWT Authentication, Payment Gateway Integration, Agile

EXPERIENCE

Java Full Stack Developer Intern

Festiva Moments, Bengaluru, India | Dec 2025 - May 2026

- Engineered modular backend components using Java, Spring Boot, and Object-Oriented Programming principles to support scalable web application infrastructure.
- Delivered secure RESTful APIs for user management, authentication, and core business workflows.
- Streamlined MySQL database integration with backend services and optimized complex SQL queries to enhance data retrieval performance.
- Collaborated with cross-functional teams in an Agile environment, actively participating in sprint planning, code reviews, and feature delivery.
- Implemented global exception handling, robust input validation, and structured logging to maximize application reliability.
- Leveraged Git and GitHub for version control, branch management, and collaborative software development practices.
- Contributed to system testing and debugging activities, systematically isolating and resolving defects prior to deployment.
- Applied the Java Collections Framework and multithreading concepts to build high-performance, reusable code components.

PROJECTS

E-Commerce Training Academy Platform | Next.js, TypeScript, Express.js, Prisma, PostgreSQL, Razorpay, JWT

- Built a full-stack e-learning platform with a decoupled architecture: a Next.js (App Router) and Tailwind CSS frontend communicating exclusively over REST with an Express 5 and TypeScript backend.
- Implemented JWT-based authentication with cookie-stored tokens forwarded from Next.js Server Components as Bearer headers.
- Enforced email verification through an OTP workflow (Resend API) that issues short-lived verification tokens, preventing any account creation without a verified email.
- Integrated Razorpay payment processing with a webhook endpoint that verifies HMAC signatures against the raw request body to guarantee tamper-proof transaction confirmation.
- Designed a PostgreSQL schema using Prisma ORM, managing migrations and seed data for courses, users, referrals, and admin.
- Developed a referral and payout module, encrypting sensitive payout details at rest with application-level encryption.
- Hardened the backend with configurable CORS allow-lists, environment-isolated secrets, and a health-check endpoint.

AI-Powered Farmer Advisory System | Spring Boot, React.js, MySQL, Gemini AI, REST APIs

- Built a full-stack web application delivering targeted agricultural guidance, crop tracking, and automated disease detection.
- Designed RESTful APIs using Spring Boot and structured MySQL schemas for reliable storage and fast access to farm records.
- Integrated the Gemini AI API to evaluate uploaded crop images, generating instant disease diagnoses, treatment plans, and preventative measures.
- Created crop recommendation and AI advisor modules to deliver personalized farming guidance based on user inputs.
- Developed a responsive React.js dashboard featuring authentication, market price tracking, and diagnostic features.
- Executed seamless frontend-backend integration using Axios alongside end-to-end debugging and performance optimization.

CERTIFICATIONS

- Java Programming Fundamentals - Infosys Springboard
- Data Structures and Algorithms Using Java - NPTEL
- Certificate of Internship, Java Full Stack Developer - Festiva Moments
