PROFESSIONAL SUMMARY

Computer Science Engineering graduate (2026) with hands-on experience in **Java, Spring Boot, and MySQL** backend development. Skilled in developing RESTful APIs, designing database-driven applications, and applying Object-Oriented Programming principles. Strong foundation in **Data Structures and Algorithms, and SQL**, with a passion for building scalable, high-quality software solutions.

EDUCATION

City Engineering College

Bachelor of Engineering in Computer Science and Engineering (CGPA: 7.88/10)

Bengaluru, India

2022 – 2026

TECHNICAL SKILLS

Programming Languages: Java (Collections, Multithreading), Python, SQL, JavaScript, HTML5, CSS3

Core CS Fundamentals: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP)

Frameworks and APIs: Spring Boot, FastAPI, LLM (LangChain), OpenAI API

Databases: MySQL, PostgreSQL

Deployment Tools: Google Cloud, Git, GitHub

EXPERIENCE

Festiva Moments

Bengaluru, India

Java Full Stack Developer Intern

Dec 2025 – May 2026

- Developed and maintained backend modules using Java, Spring Boot, and Object-Oriented Programming (OOP) principles for scalable web applications.
- Designed and implemented RESTful APIs for user management, authentication, and business workflows, ensuring secure and efficient data exchange.
- Integrated MySQL databases with backend services and optimized SQL queries to improve application performance and data retrieval efficiency.
- Collaborated with cross-functional teams in an Agile development environment, participating in sprint planning, code reviews, and feature delivery.
- Implemented exception handling, input validation, and logging mechanisms to enhance application reliability and maintainability.
- Utilized Git and GitHub for version control, branch management, and collaborative software development practices.
- Contributed to testing and debugging activities, identifying and resolving defects to ensure high-quality software releases.
- Applied Java Collections Framework and Multithreading concepts to develop efficient, reusable, and maintainable code components.

PROJECTS

AI-Powered Farmer Advisory System | *Spring Boot, React.js, MySQL, Gemini AI, REST APIs*

- Developed a full-stack web application to assist farmers with crop management, disease detection, and agricultural advisory services.
- Designed and implemented RESTful APIs using Spring Boot and integrated MySQL for efficient storage and retrieval of farmer and crop data.
- Integrated Gemini AI API to analyze crop images and provide disease identification, treatment suggestions, and prevention recommendations.
- Built crop recommendation and AI advisor modules to deliver personalized farming guidance based on user inputs.
- Developed a responsive React.js dashboard with authentication, crop management, market price tracking, and disease detection features.
- Implemented end-to-end frontend-backend integration using Axios and performed testing, debugging, and performance optimization.

Voice Morphing Detection System for Smart Home Security | *Python, Machine Learning, IoT, Audio Signal Processing*

- Developed an AI-powered smart home security system to detect morphed and spoofed voice commands before granting access to connected devices.
- Implemented audio preprocessing and MFCC-based feature extraction techniques to analyze voice characteristics and identify manipulated speech.
- Built and trained machine learning models to classify genuine and morphed voice samples, improving authentication accuracy.
- Integrated IoT components and smart home devices for real-time voice-based access control and monitoring.
- Designed a secure authentication workflow to prevent unauthorized access through voice spoofing attacks.
- Conducted testing and performance evaluation to ensure reliable real-time detection in smart home environments.

CERTIFICATIONS

- **Infosys Springboard:** Java Programming Fundamentals Certification
- **NPTEL:** Data Structures and Algorithms Using Java Certification
